WORK EXPERIENCE

Web Services (UCCS OIT Dept.) Colorado Springs, CO. (Full-time)   **01/2019 - Present**
Back-end Drupal Developer/Architect, Web Applications Developer/Programmer, and Web Designer.
- Initial creation, development, upgrade, and maintenance of the Drupal multisite codebase for our Acquia Cloud Site Factory account. Execute Drupal core and modules updates each week, search and install new modules and develop new custom modules to help manage all 220+ Drupal sites.
- Tasked with the migration of all UCCS Drupal sites from on-premises servers to our Acquia Cloud Site Factory account.
- Customization of existing Drupal themes and creation of new Drupal and WordPress themes following Marketing requirements and guidelines.
- Development of new Drupal content types, paragraph types, and media types to improve the delivery of visually appealing, functional, and intuitive content on all sites.
- Design, development, programming, and maintenance of internal and external UCCS websites and web applications using common web development languages (HTML, CSS, JavaScript, jQuery, PHP, Python, SQL) to build and expand site functionality.
- Use Git to store code, track revision history, merge code changes, revert to earlier code versions when needed, and work collaboratively with other developers.
- Create and enhance the overall website appearance and design logical site navigations that are intuitive and easy to understand.
- Ensure sites remain scalable while complying with performance and security standards. Additionally, update site content based on input from marketing and our clients.

Web Services (UCCS OIT Dept.) Colorado Springs, CO. (Part-time)   **12/2017 - 12/2018**
Student Worker Web Programmer and Web Designer.
- Web Maintenance and content update of all 220+ websites from the different departments of UCCS.
- Resolve client tickets requesting website updates using the IT service management software Cherwell.
- Guide and train our clients by email, phone, or Teams video conference meetings on how to properly use Drupal to edit and add content to their websites.
- Fix broken links, missing documents and ensure accessibility in all UCCS websites using the all-in-one website management software Siteimprove.
